Propulsion Systems, Coventry  
University, Coventry CV1 5FB, UK

Deadline for manuscript  
submissions:

**15 September 2024**

### Message from the Guest Editors

Dear Colleagues,

Researchers are exploring innovative approaches to enhance the design and performance of electrical machines. This includes the development of new machine topologies, advanced materials, and optimization techniques. Moreover, control systems play a critical role in ensuring the efficient and safe operation of these machines.

The field of Design and Control of Drives and Electrical Machines focuses on advancing the performance, energy efficiency, and reliability of electrical machines through innovative design methodologies and control strategies. This Special Issue provides a platform for researchers to exchange ideas and contribute to the ongoing progress in this dynamic field.

The aim of this Special Issue is to attract original research and review papers in the field of Design and Control of Drives and Electrical Machines. Major topics include, but are not limited to:

Permanent magnet machines;  
AC/DC machines;  
Reluctance machines;  
Multiphase machines;  
Motor control and motor drives;  
Sensorless control;  
Power electronic devices (si and wide band gap) and applications;  
Other areas in electric machines;  
Other areas in motor drives and power electronic devices.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPus / SciFinder](#), [Inspec](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
