

Energy-Harvesting Technology for Stand-Alone Self-Sustainable Sensor System

Guest Editor:

Prof. Dr. Sangkil Kim

Department of Electronics
Engineering, College of
Engineering, Pusan National
University, Busan 46241,
Republic of Korea

Deadline for manuscript
submissions:

closed (31 October 2020)

Message from the Guest Editor

This Special Issue deals with the progress in the design, modeling, and performance evaluation of the novel energy-harvesting technology for stand-alone sensor systems. The stand-alone self-sustainable energy-harvesting technology has good potential for measuring physical or chemical quantities in harsh environments and for applications requiring sensing devices with low fabrication costs, small size, and long-term measurement stability. We invite authors to contribute original research articles, as well as review articles, sustaining the continuing efforts towards innovative solutions for stand-alone self-sustainable sensors.

Potential topics of this Special Issue include, but are not limited to:

- Stand-alone self-sustainable systems
- Battery-less system
- Energy harvesting
- Printed circuits
- RF, microwave, and millimeter-wave sensors
- RF back-scattering sensors
- Design techniques and fabrication processes for autonomous sensors
- Remote sensing systems and radars

an Open Access Journal by MDPI

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
