### Message from the Guest Editors

The rapid development of electronics applications in daily life has led to increasing demand for more powerful and sophisticated devices in hospitals, public health facilities, and even in home environments. The design of medical devices necessarily requires the expertise of both engineering and medical experts. This Special Issue will provide a platform for transdisciplinary researchers to work together and to present state-of-the-art developments of electronics in medicine and healthcare. The topics of interest include but are not limited to the following:

- Bioelectronics
- Biophotonics
- Medical imaging technology, bio-imaging
- Surgical technology
- Monitoring devices
- Respiration technology
- Drug delivery systems
- Artificial organs and biomaterials
- Tissue engineering, bio-inspired materials, and molecular and cellular methods
- Devices and instruments for rehabilitation
- Telemedicine, e-health, and mobile health
- Ambient-assisted living
- Smart sensors for digital health
- Artificial intelligence for Digital Health

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
