Message from the Guest Editors

Smart Cities stand to benefit the most from connecting people, data, and things by utilizing cutting-edge ICT technology to address urban challenges.

This Special Issue aims at bringing together researchers, engineers, and practitioners from both academia and industry to exchange and share their experiences and research results on the most recent innovations, trends, and concerns as well as practical challenges encountered, and solutions adopted in the fields of smart cities. The topics of this Special Issue include but are not limited to the following:

- Smart city theory, modeling, and simulation;
- Smart city architectures and frameworks;
- Smart city implementation;
- Smart infrastructure;
- Cloud, fog, and edge computing in smart cities;
- Security and privacy solutions for smart cities;
- Big data and open data in smart cities;
- Smart city data analytics and visualization;
- AI-based solutions for smart cities;
- Services and applications for smart cities.

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
