Message from the Guest Editors

Dear Colleagues,

This Special Issue is intended to present research and scholarly papers related to “High-Performance Antenna Design and Applications”. Nowadays, most of the new electromagnetic applications that are being designed require high-performance antennas; hence, there is a substantial need for this kind of antenna. Therefore, there is a vast range of applications where this kind of antenna is used, covering a wide range of frequency bands from VHF to millimeter-wave. Likewise, novel numerical methods developed for the analysis and design of this kind of antenna are welcome.

The topics covered in this Special Issue include, but are not limited to, analysis, design, and optimization of antennas for new emerging applications. We invite contributions related to this Special Issue from experimentalists and theorists to submit their high-quality manuscripts for publication.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
