

## Millimeter and Terahertz Wireless Communications

Collection Editor:

**Prof. Dr. Yosef Pinhasi**

Faculty of Engineering –  
Department of Electrical and  
Electronic Engineering, Ariel  
University, Ariel 40700, Israel

### Message from the Collection Editor

Although the millimeter and terahertz waves cover a wide range of frequencies, which are relatively free of users, these regimes present principal challenges in the realization of wireless communication links and radars in all aspects. This Collection is aimed at addressing issues that are involved in the analysis, design, and implementation of the different communication layers featuring in a wireless link operating in the millimeter and submillimeter (Terahertz) regimes. This includes:

- Communication techniques
- Millimeter and terahertz wave technology
- Transmitter and receiver architectures
- The physical and the medium access control (MAC) layers
- Modulation waveforms and coding
- Passive and active components
- Antennas
- Terrestrial links
- Satellite communications
- Personal, local, and wide area wireless networks
- The 5th generation of cellular communication
- Propagation in the atmospheric medium and through the ionosphere
- Weather conditions effects (humidity, fog, haze, dust, rain, etc.)
- Frequency allocation and standardization
- Utilization of unlicensed bands
- The 6th generation in the future

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Flavio Canavero**

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
