## Network Slicing

Guest Editors:

### Dr. Bin Han

Division of Wireless  
Communication and Radio  
Positioning, University of  
Kaiserslautern, Kaiserslautern,  
Germany

### Prof. Dr. Simon Pietro Romano

Department of Electrical  
Engineering and Information  
Technology, University of Napoli  
Federico II, Naples, Italy

### Prof. Dr. Patrick Seeling

Department of Computer  
Science, Central Michigan  
University, Mount Pleasant, MI  
48859, USA

Deadline for manuscript  
submissions:

**closed (30 November 2022)**

## Message from the Guest Editors

Network slicing, as the most significant enabling technology of the 5G era, allows multiple logical networks (network slices) to share the same telecommunication network infrastructure. It brings to 5G networks enhancements in flexibility, resource efficiency, and security; and thereby identifies 5G with a capability of specialization with respect to highly heterogeneous service types. We solicit original papers in areas including but not limited to:

- Architectural design of network slicing for industrial verticals;
- End-to-end network slicing;
- Energy efficiency of sliced networks;
- Machine learning and artificial intelligence for network slicing;
- Network slicing framework for the integration of terrestrial and non-terrestrial networks;
- Network slicing with heterogeneous radio access technologies;
- New business models in network slicing;
- Privacy and security in network slicing;
- Resource provisioning, orchestration, and management for network slicing;
- Service-level agreement design for sliced networks;
- Sliced network operation and management;
- Technologies of software-defined networks and network function virtualization.

This is a joint special issue with *Network*.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Flavio Canavero**

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
