

Reliability Analysis for Photovoltaic Systems

Guest Editor:

Dr. Mahmoud Dhimish

Co-Director of Photovoltaics Laboratory and Lecturer in Electronics and Control Engineering, Department of Engineering and Technology, University of Huddersfield, Huddersfield HD1 3DH, UK

Deadline for manuscript submissions:

closed (31 August 2020)

Message from the Guest Editor

Cutting-edge IoT-based monitoring units and globalized protocols can considerably improve the quality of operation of photovoltaics (PV) systems. Extracting useful data of PV systems can improve the reliability, durability, and lifetime performance through enhanced data analytics tools, degradation estimation procedures, and early-stage fault detection. Therefore, the aim of this Special Issue is to solicit original and high-quality research articles related to the aforementioned topics. In particular, topics of interest include but are not limited to:

- IoT-based monitoring of photovoltaic systems;
- Data analytics tools for PV systems performance analysis;
- Reliability and durability metrics for PV systems;
- PV fault detection (AI-based and mathematical methods);
- Degradation of PV modules;
- Power electronics reliability associated with PV systems integration.

Welcome to contribute!

an Open Access Journal by MDPI

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
