

## Signal Processing and Analysis of Electrical Circuit

Guest Editors:

**Prof. Dr. Adam Glowacz**

Department of Automatic,  
Control and Robotics, AGH  
University of Science and  
Technology, 30-059 Kraków,  
Poland

**Prof. Dr. Grzegorz Królczyk**

Department of Manufacturing  
Engineering and Production  
Automation, Opole University of  
Technology, 45-758 Opole,  
Poland

**Prof. Dr. Jose Alfonso  
Antonino-Daviu**

Instituto Tecnológico de la  
Energía, Universitat Politècnica  
de València, 46022 Valencia,  
Spain

Deadline for manuscript  
submissions:

**closed (31 August 2019)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue invites original research papers that report on the state-of-the-art and recent advancements in signal processing and analysis of electrical circuits. The analysis of electrical circuits is an essential task in the evaluation of these systems. Circuits are made up of interconnections of various elements such as resistors, inductors, transformers, capacitors, semiconductor diodes, transistors, and operational amplifiers. The electrical voltages, currents, and acoustic and vibrational signals that carry useful information are known as diagnostic signals. The extraction of information from a signal, the modification of a signal from one form to another, the separation of a signal from noise, spectrum analysers, image processors, etc., are also essential for telecommunications, instrumentation, control, and other applications. Prospective authors are invited to submit high-quality original contributions and reviews to this Special Issue.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Flavio Canavero**

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
