Message from the Guest Editors

This Special Issue will present scholarly papers that address critical issues in theory, design, manufacturing (use of new materials and manufacturing process) and measurements (such as fast near-field measurements) of both printed antennas and frequency selective surfaces for being used in new communication standards.

Keywords:

- Printed antenna
- Frequency selective surface
- Measurements
- New materials and constructive models
- 2D and 3D radiating structures
- Millimeter waves

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems

Engineering)
