### Message from the Guest Editors

This is a Special Issue of the journal *Electronics* dedicated to textile-based wearable electronic devices for health monitoring, an area in which innovative work is expected to explore new frontiers and challenges, including smart clothing, e-textiles, and smart materials, as well as large-scale deployments and innovative use for healthcare monitoring applications.

To help bring some new insights into the development and trends of wearable electronics, the editors invite the community to support *Electronics* in this timely initiative by submitting new and ground-breaking papers that will constitute the roadmap of our future research.

The particular topics of interest include, but are not limited to:

- Smart clothing;
- E-textiles;
- IoT for wearable technology;
- Healthcare monitoring system;
- Wearable technology, wearable devices, and fashion electronics.

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
