

Special Issue

Recent Advanced Applications of Virtual Reality and AI-Driven Human Activity Recognition

Message from the Guest Editors

Artificial intelligence and virtual reality provide powerful frameworks for the analysis, recognition, and interpretation of human activities by using advanced algorithms and immersive environments to gain deeper insights into health, well-being, education, sports, and entertainment. In order to promote the latest achievements, progress, algorithms, application practices, and other aspects of VR and AI in the field of human activity recognition, we invite prospective authors to contribute to this Special Issue. Original research articles on technological and application-oriented aspects of this field, as well as reviews, are welcome. These research areas may include (but need not be limited to) the following:

- Deep learning for human activity recognition;
- AI processing in virtual environments;
- AI and sensor data fusion;
- Immersive technologies;
- Intelligent VR systems;
- Intelligent activity tracking;
- Sensor modalities integration;
- Performance metric;
- Dataset labelling strategies;
- IoT and VR platforms for HAR;
- Applications of HAR for understanding behaviour.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
