

# Special Issue

## Telecommunication Networks

### Message from the Guest Editors

Telecommunication networks have for many years been important elements of backbone and access networks. The main objective of this Special Issue is to report recent developments in architectures, protocols, algorithms, and techniques of telecommunication networks, including issues such as design, dimensioning, modeling, control and performance evaluation, and optimization. Authors of both theoretical and application-oriented papers presenting emerging ideas and technologies to solve various unsolved problems and challenges in telecommunications networks are welcome.

---

### Guest Editors

Prof. Dr. Piotr Zwierzykowski

Prof. Dr. Erich Leitgeb

Dr. Paweł Śniatała

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
