## Advanced Research on Internal Combustion Engines and Engine Fuels—2nd Edition

Guest Editors:

**Dr. Zongyu Yue**

State Key Laboratory of Engines,  
Tianjin University, Tianjin 300072,  
China

**Prof. Dr. Haifeng Liu**

State Key Laboratory of Engines,  
Tianjin University, Tianjin, China

**Dr. Chao Jin**

School of Environmental Science  
and Engineering, Tianjin  
University, Tianjin 300072, China

Deadline for manuscript  
submissions:

**17 September 2024**

### Message from the Guest Editors

Internal combustion (IC) engines serve as the main power devices that widely applied in the fields of transport, engineering machinery, stationary power generation, etc. Advanced fuels with specific properties can offer even more potential in engine combustion and emissions improvements. Therefore, the next-generation IC engine will rely on the co-evolution of both engine and fuel technologies.

This Special Issue is dedicated to the frontiers in engine combustion and fuel research, with emphasis on the co-development of engines and their fuels. Topics of interest include, but are not limited to:

1. Advanced engine combustion;
2. Engine combustion improved by fuel additives or biofuel blends;
3. Application of zero-/low-carbon fuels to IC engines;
4. Interactions of engine combustion and fuel;
5. Injection and spray process for advanced fuels;
6. Combustion fundamentals and chemical kinetics for advanced fuels;
7. Aftertreatment system for engines with advanced fuels.

Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
