Message from the Guest Editors

This *Special Issue* would like to collect all the original research and review works dealing with:

- Experimentation and optimisation of innovative anaerobic technologies;
- Engineering techniques for biogas production enhancement;
- Novel mathematical modelling approaches applied to anaerobic technologies;
- Ground-breaking control strategies aimed at optimising the energy production and utilisation from bioresources through anaerobic treatment;
- Carbon footprint analysis of anaerobic technologies.

Works dealing with biomethane production from bioresources, such as domestic and industrial wastewaters or solid wastes, are all welcome.

It is recommended to send a tentative title and a short summary of the manuscript to Energies Editor Ms. Cicilia <cicilia.liu@mdpi.com>.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
