Carbonate Reservoirs, Geothermal Resources and Well Logging

Guest Editors:

Prof. Dr. Jadwiga A. Jarzyna

Faculty of Geology Geophysics and Environmental Protection, AGH University of Science and Technology, 30-059 Krakow, Poland

Dr. Bogdan Mihai Niculescu

Department of Geological Engineering and Geophysics, Faculty of Geology and Geophysics, University of Bucharest, 6 Traian Vuia Street, 020956 Bucharest, Romania

Dr. Edyta Puskarczyk

Faculty of Geology Geophysics and Environmental Protection, AGH University of Science and Technology, 30-059 Krakow, Poland

Message from the Guest Editors

The title of the Special Issue combines the subjects, which together, may turn out to be an efficient and effective tool in the prospection and recognition of new hydrocarbon and water resources.

In this Special Issue, we would like to present papers dealing with current problems related to measurements, processing, and interpretation of well logs used in various projects for the prospection of hydrocarbons in carbonates and for geothermal reservoirs. We invite authors specializing in technological novelties and those who would like to show statistical methodologies for processing big data sets and using old data together with the newest results for reinterpretation. Well logging should be seen in all its variety as a useful tool for carbonate reservoirs for hydrocarbon and geothermal waters.

Deadline for manuscript submissions:

closed (31 December 2023)

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
