Research on Refrigeration and Energy Storage for Carbon Emission Reduction

Guest Editors:

Dr. Yijian He

Institute of Refrigeration and Cryogenics, Zhejiang University, Hangzhou 310027, China

Prof. Dr. Lijuan He

School of Energy and Environment, Inner Mongolia University of Science and Technology, Baotou 014010, China

Dr. Xiuzhen Li

Institute of Building Energy and Thermal Science, Henan University of Science and Technology, Luoyang 471023, China

Deadline for manuscript submissions:

10 February 2025

mdpi.com/si/181631

Message from the Guest Editors

This Special Issue aims to present and disseminate the most recent advances related to the theory, design, modelling, application of all types of refrigeration and energy storage technologies, to promote the progress and innovation of refrigeration and energy storage.

Topics of interest for publication include, but are not limited to:

Application and optimization of renewable energy in refrigeration;

Innovative applications of refrigeration in energy storage and conversion;

Development and evaluation of new refrigeration and energy storage materials;

Application of intelligent control and optimization algorithms in refrigeration and energy storage;

Energy-saving retrofit and performance optimization of refrigeration and energy storage equipment;

Design and experimental research on environmentally friendly refrigeration and energy storage systems;

Model and evaluation on carbon emission reduction of new refrigeration and energy storage technologies;

Exploration on integration between energy storage and refrigeration.

Special Issue

energies

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
