Deadline for manuscript  
submissions:

**closed (26 May 2024)**

### Message from the Guest Editor

Dear Colleagues,

Unconventional oil resources refer to oil produced using techniques other than those used in conventional production. The powerful combination of horizontal drilling and hydraulic fracturing enables significantly more production from those resources. However, because of the ultra-low permeability and rapid depletion of pore pressure near the hydraulic fractures and wellbore, oil production for most wells declines sharply. It is estimated that the hydrocarbon recovery from these wells is going to be low, typically less than 10%. This Collection is dedicated to the latest research on IOR/EOR for unconventional oil reservoirs. We also welcome submissions on numerical simulations, especially the impact of nanopore confinement and geomechanics coupling on different EOR methods optimization and forecast.

To embrace rapidly evolving solutions and strategies to unconventional reservoir management problems, this timely collection also aims to take a snapshot of current advances in the development of a life-of-field surveillance plan and effective conformance control strategies.

Dr. Abdelazim Abbas

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
