# Electrode Materials for Lithium-Ion and Sodium-Ion Batteries: Developments, Challenges, and Prospects

Guest Editor:

**Dr. Hubert Ronduda**
Faculty of Chemistry, Warsaw University of Technology, Noakowskiego 3, 00-664 Warsaw, Poland

Deadline for manuscript submissions:
**7 November 2024**

## Message from the Guest Editor

The 2019 Nobel Prize in Chemistry recognized the significance of Li-ion battery technologies, and the commercialization of Na-ion batteries has gradually begun due to their advantages of having a lower cost and wider source of raw materials. This Special Issue aims to highlight the latest updates and prospects of electrode materials for Li-ion and Na-ion batteries.

Authors in this field are invited to submit contributions in the form of original research articles and reviews to this Special Issue. Potential topics include, but are not limited to, the synthesis of anode and cathode materials, innovative electrode material structures, scaling up the electrode material synthesis process for large-scale battery applications, etc. Battery performance improvements in terms of energy and power density, cycle life, operation conditions, and battery safety are within the scope of this Special Issue. The recycling concepts for electrode materials are also welcome.

“Energies” invites submissions and article proposals for an upcoming Special Issue on Li-ion and Na-ion battery research.

## Editor-in-Chief

**Prof. Dr. Enrico Sciubba**
Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.
**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.
**Journal Rank:** CiteScore - Q1 (Control and Optimization)
