Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editors

Dear Colleagues,

Power systems are complex and interconnected networks that facilitate the generation, transmission, and distribution of electrical energy. Modeling, simulation, and optimization are crucial tools for understanding and managing the complex behavior of power systems, as well as for designing more efficient and reliable power systems.

This Special Issue seeks to bring together researchers and practitioners from academia to present the latest advances in the modeling, simulation, and optimization of power systems.

We invite original research papers, review articles, and case studies on topics that include, but are not limited to:

- Power system modeling and simulation techniques.
- Optimization methods for power system planning and operation.
- Energy management systems and smart grid technologies.
- Power system stability and control.
- Power system protection and reliability.
- Power electronics and renewable energy integration.
- Power system dynamics and transient analysis.
- Demand response and energy storage systems.
- Cybersecurity in power systems.
- Economic analysis of power system planning and operation.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
