Message from the Guest Editors

Dear Colleagues,

The Special Issue "In-Depth Investigations in Bioenergy" aims to provide a comprehensive exploration of various aspects related to bioenergy production, utilization and sustainability. In addition, it is dedicated to the examination of bioenergy sources, technologies, environmental impacts and policy considerations and aims to provide a thorough understanding of the current state and future opportunities in this field. The scope of this topic includes, but is not limited to, the following:

- (1) Bioenergy sources and conversion technologies
- (2) Sustainability and environmental impact
- (3) Technological advances and innovations
- (4) Economic viability and market dynamics
- (5) Policy framework and regulatory landscape
- (6) Integration with renewable energy systems
- (7) Challenges and research gaps
- (8) Future prospects and emerging trends

energies

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
