

## Energy Performance and Application Possibilities of Photovoltaic Modules

Guest Editors:

**Dr. Dariusz Kurz**

Institute of Electrical Engineering and Electronics, Faculty of Automatic, Robotics and Electrical Engineering, Poznan University of Technology, 60-965 Poznan, Poland

**Prof. Dr. Agata Zdyb**

Department of Renewable Energy Sources Engineering, Faculty of Environmental Engineering, Lublin University of Technology, Nadbystrzycka 40B, 20-618 Lublin, Poland

**Dr. Andrzej Tomczewski**

Institute of Electrical Engineering and Electronics, Faculty of Automatic, Robotics and Electrical Engineering, Poznan University of Technology, 60-965 Poznan, Poland

Deadline for manuscript submissions:

**closed (2 April 2024)**

### Message from the Guest Editors

The fight for the natural environment is associated with the constant search for new or improved existing systems for obtaining renewable energy sources (RESs). This involves interdisciplinary research in chemistry, physics, materials engineering, electricity, energy grids, energy system design, and energy policy. It is important to search for new material and application solutions for the already-existing elements in order to use them as effectively as possible in the process of converting solar energy into electricity.

This Special Issue covers the following topics:

- bifacial modules;
- DSSC modules;
- building-integrated photovoltaics (BIPV);
- connection of photovoltaic systems with wind turbines or energy storage in order to improve the parameters of the energy network;
- photovoltaic thermal (PV/T) systems;
- solar trackers;
- physical and chemical properties of PV cells;
- improving the connectivity of PV cells.

Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
