Message from the Guest Editors

The aim of this *Special Issue* is to present the most recent research results concerning the economic analysis of energy transitions and sustainability issues in tourism.

Topics of interest for publication include, but are not limited to:

- Energy transition in tourism;
- Energy transition and economic growth;
- Economic impact of energy transitions;
- Energy consumption and tourism development;
- Energy consumption and environmental degradation;
- Energy consumption and economic growth;
- Environmental sustainability in tourism;
- Economic impact of environmental sustainability measures;
- Interaction between carbon emissions, economic growth, energy and tourism.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
