closed (31 January 2024)

Message from the Guest Editors

Dear Colleagues,

A strong global economic recovery following the COVID-19 pandemic has boosted the importance of renewable energy sources (RESs) in solving the energy crisis. However, RES is crucial to the transition to a more sustainable and responsible energy future. A Special Issue on "Trends in RESs Generation System" will be published in the international journal *Energies*, which will research and cover original studies with regards to the abovementioned topics, including, but not limited to: costs of sustainable technologies; advancements in storage technologies; and digitalization for effective and secure integration; artificial intelligence and machine learning in RESs; green hydrogen energy; the Internet of Things (IoT) applications; renewable portfolio standards (RPS); and renewable energy certificate. Review papers and studies that distinctly include recent advancements in RES generation are welcome.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
