## Advances in Supercritical CO<sub>2</sub> Power Cycle Applications

Guest Editor:

### Dr. Seongmin Son

1. Department of Smart Plant Engineering, Kyungpook National University, Sangju 37224, Republic of Korea

2. Department of Convergence & Fusion System Engineering, Kyungpook National University, Sangju 37224, Republic of Korea

Deadline for manuscript submissions:

**20 November 2024**

### Message from the Guest Editor

The behaviour of nearly critical fluids, the physical singularity of matter, is fascinating and of interest to the engineering community. Power generation using supercritical CO<sub>2</sub> technology is attracting attention as an innovation that can contribute to the global energy crisis by making a more efficient system. However, supercritical CO<sub>2</sub> systems that actively exploit the rapid changes in properties near the criticality are still largely unexplored and require active research and development.

This Special Issue aims to present and disseminate the most recent advances related to the theory, design, modelling, application, control, and condition monitoring of all types of near-critical CO<sub>2</sub> power conversion system.

The topics of interest for publication include, but are not limited to:

- All aspects of supercritical CO<sub>2</sub> systems;
- Novel applications of near-critical CO<sub>2</sub> systems;
- Control logics for supercritical CO<sub>2</sub> systems;
- Operation and maintenance technologies for supercritical CO<sub>2</sub> systems;
- Advanced modelling approaches;
- Optimal design methodologies;
- Numerical analysis methodologies.

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
