### Message from the Guest Editors

*Energies* is delighted to invite prospective authors to submit original research papers covering innovations associated with active disturbance rejection control in power electronics. Topics of interest include, but are not limited to:

- active disturbance rejection control (ADRC)
- extended state observer (ESO)
- state and disturbance observer
- control system design
- power electronics control
- disturbances and uncertainties
- stability and reliability
- power quality
- sensor noise suppression
- AC or DC power electronic converters
- multilevel power electronic converters
- DC or AC microgrids
- renewable energy integration
- electric drive
- electric vehicles
- electrical energy conversion systems
- hardware-in-the-loop testing
- power hardware-in-the-loop testing

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
