## Alternative Energy Sources

Guest Editor:

**Prof. Dr. Andrzej L. Wasiak**

Department of Production Management, Faculty of Engineering Management, Białystok University of Technology, Wiejska Street 45A, 15-351 Białystok, Poland

Deadline for manuscript submissions:

**closed (29 August 2020)**

### Message from the Guest Editor

There is a need for a wide spectrum of research on alternative resources, including renewable ones, as well as those that seem to be inexhaustible (solar energy is one such example, but resources enabling the construction of appropriate converters are more or less limited).

One of the important factors is the energetic efficiency of the harvesting and exploitation of energy derived from both fossil and alternative resources. It can be expressed as a ratio of energy delivered by the converting system to the sum of energy fluxes consumed by that system in order to assure its functioning. The search for conversion routes that consume only a small part of the energy being delivered is perhaps the biggest challenge for technological development.

The present Issue is devoted to topics that reveal the state-of-the-art in the knowledge and technological development in all of the aspects discussed above. Papers concerning existing as well as novel concepts are highly welcome.

## Editor-in-Chief

### Prof. Dr. Enrico Sciubba

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
