Assessment, Management and Treatment of Waters and Geothermal Systems

Guest Editor:

Prof. Dr. Barbara Tomaszewska

Faculty of Geology, Geophysics and Environmental Protection, AGH University of Science and Technology, Mickiewicza 30, 30-059 Kraków, Poland

Deadline for manuscript submissions:

closed (20 July 2020)

Message from the Guest Editor

I am inviting submissions to a Special Issue of *Energies* on “Assessment, Management, and Treatment of Waters and Geothermal Systems”.

The rational management of water and energy and limiting climate change are the main challenges of the 21st century. Water scarcity and poor quality are the real problems for both well- and less-developed countries. Water stress is also observed in highly industrialized regions that paradoxically have a lot of water, but it is mostly not useful for direct consumption. That is why solutions regarding the sustainable supply of clean water and energy, including on the basis of geothermal water and energy, in the age of observed climate changes is one of the priority research areas on a global scale.

Water and energy are vital resources needed to resolve critical issues to build a sustainable and desirable economy, improve life conditions and health, and to avoid hunger in many parts of the world...

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
