Biofuel and Bioenergy Production from Microalgae

Guest Editor:

Dr. Rocio Maceiras

Defense University Center at the Spanish Naval Academy, Plaza de España s/n, 36920 Marín, Pontevedra, Spain

Deadline for manuscript submissions:

closed (20 June 2023)

Message from the Guest Editor

Microalgal biofuels are a promising alternative to fossil fuels. Microalgae biomass can be converted into biofuels from two different routes: biochemical conversion and thermochemical conversion. The development of a suitable conversion approach is one of the key challenges for the economic viability and the sustainability of biofuel production.

This Special Issue of *Energies* invites manuscripts from authors who develop biofuels and/or bioenergy from microalgae. High-quality original papers that explore areas of microalgae cultivation and harvesting, biofuels or bioenergy production are sought. Reviews that provide emerging solutions and visions for future research activities are also invited to contribute to this Special Issue. Topics of interest for publication include but are not limited to:

- Microalgae-based biofuels and bioproducts;
- Emerging technologies in algae biofuel production;
- Biohydrogen production from microalgae;
- Wastewater-based algae biofuel production;
- Harvesting of microalgae: overview of process options and their strengths and drawbacks;
- Economics of microalgae cultivation, biofuels, and bioenergy production.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
