## Biomass Pretreatment and Biomass Conversion to Biofuels

Guest Editors:

**Prof. Dr. Byong-Hun Jeon**

Department of Earth Resources  
and Environmental Engineering,  
Hanyang University, 222  
Wangsimni-ro, Seongdong-gu,  
Seoul 04763, Republic of Korea

**Dr. El-Sayed Salama**

Department of Occupational and  
Environmental Health, School of  
Public Health, Lanzhou  
University, Lanzhou 730000,  
China

**Dr. Mayur B. Kurade**

Department of Earth Resources  
and Environmental Engineering,  
Hanyang University, Seoul 04763,  
Republic of Korea

Deadline for manuscript  
submissions:

**closed (31 July 2019)**

### Message from the Guest Editors

This Special Issue will cover all aspects related to pretreatment technologies for the processing of biomass and further conversion of biomass to biofuels. Emphasis will be given to the new advancements in biological processes, such as fermentation and anaerobic digestion of biomass for achieving high yields of biofuels.

### Topics of interest include, but are not limited to:

- Cost-effective biological and thermochemical pretreatments for the conversion of biomass;
- Factors influencing biomass conversion, such as the composition and structure of biomass;
- Biomass conversion to liquid fuels through fermentation;
- Advancements in anaerobic digestion of biomass for higher yield in gaseous fuels;
- Anaerobic co-digestion of biomass;
- Process inhibitors and challenges in biological conversion of biomass and the strategies to eliminate them;
- Economics of biomass conversion to fuels via biological processing.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
