

energies

an Open Access Journal by MDPI

Building, District, and Community Energy Systems Optimization

Guest Editors:

Dr. Fuzhan Nasiri

Department of Building, Civil, and Environmental Engineering (BCEE), Concordia University, Montreal, Quebec H3G 1M8, Canada

Dr. Mohammad Sameti

Energy Institute, School of Chemical and Bioprocess Engineering, University College Dublin, Dublin, Ireland

Deadline for manuscript submissions:

closed (20 September 2021)

Message from the Guest Editors

The purpose of this Special Issue is to try to fill the knowledge gap that presently exists on the use of optimization models to address these decisions in an *integrated* manner. We invite original contributions regarding recent developments and novel ideas in applications of whole system models and optimization techniques. Potential topics include but are not limited to design and operation of mechanical systems for energy conversion, distribution, and storage; building refurbishment decisions; renewable energy integration in buildings; combined heat and power systems, control systems (real-time and predictive); energy recovery; environmentally-friendly designs, fault diagnostics, and maintenance management; and emerging applications of data analytics and machine learning in building and district energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
