Message from the Guest Editors

Dear Colleagues,

The Water Cooled Lithium Lead (WCLL) is the European Test Blanket Module of ITER and one out of two Breeding Blanket candidates of EU-DEMO. Design activities are ongoing and involve analyses in a wide spectrum of technical areas, such as neutronics, thermo-mechanics, thermo-hydraulics, hydro-dynamics, magneto-hydrodynamics, tritium transport, and safety. These efforts are conducted with growing awareness thanks the continuous R&D efforts pursued in a wide spectrum of technology fields, i.e. the technologies of PbLi, of tritium, of water coolant, of the structural material. We invite scientists and experts to report scientific and technical activities and achievements of year 2022 in a Special Issue dedicated to the Water Coolant Lithium Lead Breeding Blanket and Test Blanket Module.

Deadline for manuscript submissions:

closed (10 October 2023)

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
