The Impact of COVID-19 on the Socio-Economic Environment

Guest Editors:

Prof. Dr. Ligita Šimanskienė

Department of Management,
Klaipėda University, Klaipėda,
Lithuania

Prof. Dr. Erika Župerkienė

Department of Management,
Klaipėda University, Klaipėda,
Lithuania

Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editors

We all live in an ever-changing world. Some changes create prosperity for the global community, some become a challenge to save lives. The global COVID-19 pandemic has affected all areas of our lives, so we invite researchers to share their research in this issue. We are looking for articles in the field of socio-economic environment. We are waiting for your articles, starting from the analysis of economic support measures implemented by different countries to the attitude of the population towards various restrictions; from changes in consumer behaviour in the time of a pandemic to responsible consumption; organizational management changes in organizing work remotely to employees' psycho-emotional attitudes to the current situation; the necessary communication at the state level with the population to the communication within the organization; and the goals of implementing the national sustainable development strategy to volunteering initiatives in communities. As you can see, the field of research is indeed wide, but all of them are linked by socio-economic factors and the global COVID-19 pandemic. We hope you will be a part of this scientific issue.

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
