### Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to disseminate novel control and optimisation techniques for DC microgrids. Topics of interest for publication include but are not limited to:

- DC microgrid control
- Optimization in DC microgrids
- Hierarchical control in DC microgrids
- Energy management systems for DC microgrids
- Distributed/decentralised control in DC microgrids
- Multiagent systems for DC microgrids
- Stability in DC microgrids
- Real-time monitoring and control
- Microgrid clusters
- Application of the Internet of Things in DC microgrid
- Blockchain energy management systems

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compindex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
