Communication Networks in Power Systems

Guest Editor:

Dr. Salman Mohagheghi

Electrical Engineering
Department, Colorado School of
Mines, 1610 Illinois St., Golden,
CO 80401, USA

Deadline for manuscript
submissions:

closed (10 October 2020)

Message from the Guest Editor

The modern power grid is becoming more dependent on components and modules that interact with one another through sharing information. Every minute, multitude of measurement data, command signals, alarms, and status updates are being exchanged between various intelligent electronic devices that monitor, control and protect the grid, thanks to the communication network that serves as the backbone of this system. This Special Issue of *Energies*, “Communication Networks in Power Systems,” is intended for disseminating new promising methods and techniques to model and analyze this network and to ensure its security, reliability, and quality of service.

Prospective authors are invited to submit original contributions or survey papers for review for publication in this Special Issue.

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
