Deadline for manuscript
submissions:

18 September 2024

Message from the Guest Editor

Dear Colleagues,

Renewable energy has become a crucial issue for the future of humanity. The need to reduce carbon emissions and combat climate change has driven the research and development of renewable energy technologies to an unprecedented pace. This Special Issue will focus on the latest advances in this field, focusing on the following areas. Wind energy: advances in wind turbines, both onshore and offshore, will be discussed, including new materials, designs, and control strategies. Solar energy: the latest technologies in solar photovoltaic and thermal energy will be addressed, including high-efficiency solar cells, solar concentration systems, and innovative applications. Wave, tidal, and ocean energy: technologies for harnessing the energy of waves, tides, and ocean currents will be explored, including wave and tidal energy converters. Power electronics: advances in power electronics for efficiently integrating renewable energy into the electricity grid will be analyzed. Bioenergy: the latest research on biofuels, biogas, and other forms of energy derived from biomass will be discussed.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
