### Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to support the implementation of RES by increasing the scientific and interdisciplinary knowledge of innovative supporting mechanisms for the development of RES. Currently, determining the directions and trends of the development of RES seems to be the strategic direction of research, both from the technological and developmental point of view. It is also important to observe social attitudes towards RES, as the sustainable development of natural and social environment is important in the research on RES.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
