Deadline for manuscript submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue is not limited to the topic of electricity saving. We also are considered. As such, we invite articles providing evidence on how various actors in supply chains reduce their energy consumption to reduce the ecological footprint and what the determinants of their actions are.

The scope of this Special Issue will cover a variety of topics, including, but not limited to:

- Sustainable supply chain management;
- Sustainable production;
- Sustainable logistics;
- Carbon management logistics systems;
- Design for sustainability;
- Product lifecycle management for sustainability;
- Sustainable IT for supply chains;
- Circular economy;
- The consumption and overconsumption of energy;
- Energy consumption rationalisation;
- Renewable energy sources in supply chains;
- Patterns of energy consumption;
- Sustainable energy consumption.

Prof. Dr. Rafał Haffer

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
