Sustainable Development and Spatial Policy for Renewable Energy Systems

Guest Editors:

Prof. Dr. Maciej J. Nowak

Department of Real Estate,
Faculty of Economics, West
Pomeranian University of
Technology, 70-310 Szczecin,
Poland

Dr. Oleg Golubchikov

School of Geography and
Planning, Cardiff University, King
Edward VII Avenue, Cardiff CF10
3WA, UK

Prof. Dr. Valentine Udoh

James

Department of Geosciences,
College of Natural Sciences and
Applied Technology,
Pennsylvania Western University
(PennWest), Clarion, PA 16214,
USA

Deadline for manuscript
submissions:

13 November 2024

Message from the Guest Editors

The development of renewable energy systems needs to step up its investment in energy efficiency and renewable technologies, also bringing along technical and business challenges. However, the transition to a low-carbon and sustainable economy can be a difficult and costly process requiring techno-economic assessments.

This Special Issue of *Energies* aims at deepening the understanding surrounding renewable and sustainable energy systems, and the relationships between spatial planning and renewable energy investments. This Special Issue welcome research topics include the following:

1. Renewable energy investments and sustainable development;
2. The role and place of renewable energy investments in spatial development plans at different levels;
3. Planning for the commission and decommission of renewable energy installations;
4. Renewable energy investments and the demand for flexibility in planning;
5. Environmental protection, policy and renewable energy investments;
6. Statutory changes in different countries regarding the planning basis for renewable energy investments;
7. Spatial conditions for the implementation of distributed energy in individual countries.

Special Issue

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
