Deadline for manuscript submissions:
closed (30 April 2020)

Message from the Guest Editor

Dear Colleagues,

The aim of the Special Issue "Energy Systems for the Residential and Tertiary Sector" is to be a high-quality forum for the dissemination of research on energy systems suitable to meet the energy demand of the residential and tertiary sector. The technologies of interest, fed with both fossil and renewable fuels, include, but are not limited to, internal combustion engines, micro gas turbines, micro Rankine cycles, Stirling engines, heat pumps, absorption chillers, solar panels, and wind turbines. Studies about sizing and management of energy storage coupled with the considered energy systems, as well as their integration with energy distribution networks, are also welcome.

Prof. Mauro Venturini
Guest Editor

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Control and Optimization)
