### Message from the Guest Editor

The purpose of the issue is to collect studies that reveal and discuss the problems of the current stage and the forecast of the reproduction of the aggregate energy potential, which is both a special type of social wealth and a resource for further material and sociocultural development.

Topics of interest include but are not limited to economic and social aspects of energy; energy demand and supply; development of national energy systems; changing the behavior of energy consumers; long-term trends and forecasts of energy development, technology change, and effects for the economy and society; formation of a new energy civilization; and alternative scenarios for the future of the energy sector for timely adoption of the right decisions.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
