Message from the Guest Editors

This Special Issue of *Energies* focuses on the latest scientific and technical research around these topics in both academic and industrial sectors. These topics include but are not limited to the following:

- Costs and business plans
- Innovative architectures of the power trains of EVs, HEVs, P-HEVs or FCHVs;
- Design of the power trains of EVs, HEVs, P-HEVs or FCHVs, from components to systems;
- Energy management strategies for EVs, HEVs, P-HEVs or FCHVs;
- Reliability of the EVs, HEVs, P-HEVs or FCHVs (e.g., reliability analysis, fault-tolerant control, aging experimental tests, modeling, diagnosis, prognosis);
- Real-time simulation, hardware in the loop (HIL);
- Prototyping and ecosystems of EVs, HEVs, P-HEVs or FCHVs.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
