Opening of Electricity Markets to Distributed Resources: Numerical Models and Real Implementation

Guest Editor:

Dr. Davide Falabretti

Department of Energy,
Politecnico di Milano, 20133
Milan, Italy

Deadline for manuscript
submissions:
closed (10 August 2023)

Message from the Guest Editor

This Special Issue aims to bring together scientists and researchers to publish original research contributions analyzing the opportunities offered by the opening of electricity markets to distributed resources and proposing solutions to handle the uncertainties relevant to the considered scenario. From this perspective, both studies based on numerical models and real-life implementations aimed at validating theoretical approaches are of great interest in this Special Issue.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
