## Emerging DC/AC Converters for Storage and Renewable Application

Guest Editor:

**Dr. Oleksandr Husev**

Department of Mechatronics and  
Electrical Engineering, Tallinn  
University of Technology, EE-  
19086 Tallinn, Estonia

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editor

Renewable energy integration into AC residential grids along with storage systems is a hot topic of power electronics today. Its growth requires a new generation of high-performance power electronic DC/AC converters applicable for AC residential grids. The price, universal usability, reliability, efficiency, and proper control algorithms are key issues to be solved. This Special Issue is devoted to the state of art review of novel or recently proposed DC/AC converters for storage and renewable energy application. The main focus will be devoted to the feasibility study of the proposed solutions through the acquisition of new knowledge in areas related to power circuit design, control and implementation of advanced materials and active and passive components, and comparative analysis.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
