Deadline for manuscript submissions:
closed (21 February 2022)

Message from the Guest Editor

Dear Colleagues,

This Special Issue has the objective of collecting recent original research results on modeling the operation of photovoltaic systems in Northern European conditions with the aim of maximizing output power, improving integration into power systems and distribution networks, and ensuring continuity of electricity service.

- Photovoltaic systems
- Grid integration
- Fault detection
- Degradation detection
- PV in Northern Europe
- Electricity markets
- Modeling of PV system
- Weather dependence
- PV in electricity systems

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Control and Optimization)
