Message from the Guest Editors

This Special Issue of Energies aims to provide insights into recent advancements in the development of low-energy and carbon footprint building materials, while emphasising waste management and recycling.

Keywords:

- building materials
- carbon footprint
- recycling
- upcycling
- raw materials processing
- waste disposal
- recycled aggregate
- energy efficiency
- zero waste
- waste management
- sustainability
- geopolymers
- concretes
- construction demolition wastes
- durability

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
