2. Department of Building, Energy and Environment Engineering, University of Gävle, 801 76 Gävle, Sweden

Prof. Dr. Thomas Zobel

Department of Business Administration, Technology and Social Sciences, Luleå University of Technology, Luleå, Sweden

Deadline for manuscript submissions:

closed (20 December 2021)

Message from the Guest Editors

Dear Colleagues,

Improved energy efficiency and energy management are key issues for the industry as it strives to increase productivity, improve competitiveness, reduce energy costs and at the same time contribute to reaching the Sustainability Development Goals (SDGs) that are associated with energy use and reduction of greenhouse gas emissions. However, the high diversity among the various industrial sectors makes general solutions too shallow; rather, in-depth studies from various industrial sectors are needed. At the same time, energy management and in particular energy management systems are relatively new and most likely would benefit from the more mature field environmental management, in which energy efficiency is primarily studied from an environmental and sustainability perspective. Research has also shown a number of additional benefits related to energy efficiency, entitled multiple- or non-energy-benefits. Including those benefits may in the end make energy efficiency and energy management practices even more visually cost-effective and attractive for industrial decision-makers.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
