Energy Policy for a Sustainable Economic Growth

Guest Editor:

Prof. Dr. Magdalena Radulescu

Department Finance, Accounting and Economics, University of Pitesti, 110040 Pitesti, Romania

Deadline for manuscript submissions:

closed (15 October 2021)

Message from the Guest Editor

The rapid economic growth of the last few decades implies a sharp increase in energy consumption worldwide. As a result, the environment has been facing an important deterioration process. The aim of this Special Issue is to receive scientific contributions in this field, contributions which analyze the relation between the economic growth–energy consumption–CO₂ emissions and reveal the main features of environmental tax schemes and environmental policy, with a special focus on the energy area. Contributions can be represented by original research papers or review papers.

Keywords:

- Energy consumption and economic growth
- Renewable energy use
- Environmental tax (with a special focus on energy tax) and CO₂ emissions
- Sustainable economic development
- Environmental policy with focus on energy policy

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
