Romania

Deadline for manuscript  
submissions:

**closed (30 December 2021)**

### Message from the Guest Editor

Dear Colleagues,

We are now accepting submissions to the upcoming Special Issue of *Energies* on the topic of "Developments in Extracting Marine Renewable Energy". With growing concerns about greenhouse gas emissions, the impact of climate change, and environmental safety, the exploitation of renewable energy resources represents an issue of increasing importance and is receiving considerable attention worldwide. Renewable resources are abundant in marine environments and there are various technologies available to harvest their energy. However, these resources vary depending on weather conditions and location, and their assessment over extended periods is important, based on in-situ records or numerical modelling results. From this perspective, this Special Issue seeks to contribute to the knowledge in the domain of marine renewable energy through enhanced studies and multidisciplinary works.

Prof. Dr. Liliana Rusu

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
