Faculty of Electrical Engineering
and Communication,
Department of Electrical Power
Engineering, Brno, Czech
Republic

Deadline for manuscript
submissions:
closed (20 April 2019)

Message from the Guest Editor

Dear Colleagues,

Nowadays, electrical energy transmission and distribution is considered a critical infrastructure in industrially developed societies, and its protection regarding safety and security threats is being more and more common. The fact that this infrastructure is geographically spread across huge areas, together with fast development of distributed energy resources (DERs), which influence the direction of power flow in both distribution and, sometimes, in transmission grids, bring difficult technological challenges for the real-time prevention, detection, and precise localization of anomalies.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
